FDA CLASSIFICATION

The components of La Mascara are classified by the FDA as ingredients that may be used in foods. All ingredients are GRAS (generally recognized as safe).

**Chem-Mex Industries, Inc. understands that the number one consumer purchasing factor is flavor. Consumers site flavor as a purchasing factor over price, healthiness, and even food safety! With this in mind we have created an answer to the dilemma of product shelf-life vs. product quality. La Mascara is a proprietary blend of ingredients designed to mask the preservative flavor and aroma found in corn tortillas with extended shelf-life and low pH. If you have any questions about this product or need assistance with other tortilla solutions please contact us.*
